# Kentucky Legume Max

## 4-8-8

### GENERAL INFORMATION

In order to improve crop performance, **Kentucky Legume Max 4-8-8** is used as a supplement to fertilizer programs by incorporating important micronutrients at or when the plant needs them the most.

**Kentucky Legume Max 4-8-8** is designed for use on most pasture and legume crops and in numerous types of applications such as irrigation, soil and foliar applications. Always refer to a crop specialist of specific needs for use on target crop. This product contains humic acid, fulvic acid, amino acid, and organic acids which aid in proper plant development, reduced stress of plant, and superior absorption of the product into the plant.

### DIRECTIONS FOR USE

**Kentucky Legume Max 4-8-8** will disperse in water with minimal agitation. It can be tank mixed with most pesticides. Always make a small-scale test to assure compatibility. Do not mix with other fertilizer mixtures until compatibility has been determined and there is no danger of phytotoxicity.

Most liquid fertilizers (X-0-X) will mix easily with **Kentucky Legume Max 4-8-8** at normal fertilizer rates. Ammonium phosphate fertilizers have a tendency to be more compatible than orthophosphate based materials. When combining **Texas Pasture Plus 15-5-5** with phosphate fertilizers (X-X-X) maintain vigorous agitation to ensure good product mixing. Always do a jar test to verify compatibility.

### RECOMMENDED RATES

**Foliar Applications:** Low use rate for **Kentucky Legume Max 4-8-8** is 1 gallon to 10 acres in a minimum of 50 gallons of water. High use rate for **Kentucky Legume Max 4-8-8** is 1 gallon to 5 acres in a minimum of 50 gallons of water.
